With the emphasis on market-led development initiatives, sustainable urbanization is a challenge, especially in growing nations. Regional administrative efforts are crucial for cities to meet the planned city operations and specific targets and objectives. The Handbook of Research on Urban Governance and Management in the Developing World is a research publication that explores contemporary issues in regional political and administrative practices and key challenges in implementing these strategies in growing nations. Featuring

coverage on a wide range of topics such as urban and regional economics, supply chain management, and environmental concerns, this book is geared toward city development planners, policy makers, researchers, academics, and students seeking current and relevant research on the regional bureaucracy and its practices and how they affect growing nations.

General Knowledge on Law Legal GK For Competitive Examinations APH Publishing

Regulation of public infrastructure has been a topic of interest for more than a century. Yet, little is known about what works and why, when it comes to infrastructure regulation. This book intends to contribute to the understanding of infrastructure regulations by analyzing empirical cases in telecommunications, electricity and

water, with examples drawn from a number of countries in Asia and beyond. The book addresses the following questions: Does regulation work? What kind of regulation works? What kinds don't work? Why do some forms of regulation work and not others? How do we know whether they work or not? How do we isolate the effects of different political, economic and legal contexts? Are there systematic differences across infrastructure sectors that necessitate particular regulatory design? It brings together distinguished scholars and practitioners who are experts in the area to address essential issues in regulation through conceptual and empirical studies.
