HERRERA HOWARD

The Frog Commissary Cookbook

HarperCollins

The best book ever written in the field of clandestine chemistry has just gotten better in a new 8th edition. I have trained the champions of the field of clandestine chemistry for over 20 years, and this book gives the new techniques required for this constantly evolving field. I have uncovered a very easily done and supplied method for cooking your own ephedrine and pseudoephedrine from health food store and hardware store materials. This completely eliminates the need to show ID and buy adulterated and expensive pills containing these materials. I have also reconfigured older recipes to make use of the weaker or polluted materials now commonly found on hardware store shelves. This 8th edition shows the futility of politically motivated attempts by pandering politicians to regulate the private lives of individuals.

Secrets of Methamphetamine Manufacture 8th Edition

This book earns it's name! Over the course of 172 pages, I have taken all the great material in the first ed, and added to it a series of recipes and procedures which are very low profile and stunningly effective. This treasure trove of information features the Hardware Store Nitro recipe, fuel/air explosives, butt kicking ammonium nitrate formulations, nitromethane mixtures and a vastly improved detonator section. The fun doesn't stop there either. Read all about the construction of remote control cruise missiles and RC torpedoes. Claymore mines and air cannons add spice to the stew. Then top it off with my commentary on the easiest way to obtain all the materials one would need. I've read all the books on the topic of explosives, from tiny paperbacks to 600 page volumes written by PhDs. I have no hesitation saying I've topped them all!
