GCSE Literature Boost: A Christmas Carol
Cambridge University Press

Gorgeous, spirited and extravagantly rich, Cora Cash is the closest thing 1890s New York society has to a

princess. Her masquerade ball is the prelude to a campaign that will see her mother whisk Cora to Europe, where Mrs Cash wants nothing less than a title for her daughter. In England, impoverished blue-bloods are queueing up for introductions to American heiresses, overlooking the sometimes lowly origins of their fortunes. Cora makes a dazzling impression, but the English aristocracy is a realm fraught with arcane rules and pitfalls, and there are those less than eager to welcome a wealthy outsider...

[A/AS Level English Language for AQA Student Book](#) Bloomsbury Publishing

It is a simple story. A 37-year-old man belonging to the Traveller community is shot dead by a special unit of the French police on the family farm where he was hiding since he failed to return to prison

after temporary release. The officers claim self-defense. The relatives, present at the scene, contest that claim. A case is opened, and it concludes with a dismissal that is upheld on appeal. Dismayed by these decisions, the family continues the struggle for truth and justice. Giving each account of the event the same credit, Didier Fassin conducts a counter-investigation, based on the re-examination of all the available details and on the interviews of its protagonists. A critical reflection on the work of police forces, the functioning of the justice system, and the conditions that make such tragedies possible and seldom punished, *Death of a Traveller* is also an attempt to restore to these marginalized communities what they are usually denied: respectability.

Highlighting marginalized but significant perspectives about the sociopolitical essence of English language tests and testing processes worldwide, this book explores the social considerations of testing theories and practices from a critical perspective. Investigating concerns surrounding power inequalities, *The Sociopolitics of English Language Testing* takes a socially-situated view of language assessment, bringing sociopolitical understandings of language teaching, learning, and assessment to the forefront in the field.

Within the broader discussion of the politics of test use, an international team of language and education experts address the issues of ideology, diversity, power, and dominance in English language testing. Through socially-sensitive theoretical as well as empirical discussion and investigation of English language testing, this book offers valuable insights, not only to applied linguists and the language education community who have focused on positivistic and cognitively-oriented conceptions of language testing, but to anyone who wishes to venture beyond the traditional bounds of the field.

Creativity in the English Curriculum is

essential reading for anyone involved or interested in the teaching of English, offering both a detailed history of how creativity has informed the tradition of teaching English, and how it should be used to position this teaching in the future. Highlighting the need to promote creativity as a rich, intellectual pursuit, *Creativity in the English Curriculum* celebrates artistry in English past and present, and argues for its restoration to the curriculum. It emphasises that creativity is at the core of a humane education, not only through stimulating and enhancing the growth of the individual, but also through developing understanding of the importance of community, society and collaboration. Smith presents the historical relationship between curriculum policy and

creativity, demonstrating that creativity has and always will be the life blood of teaching and learning. Including dialogues between expert English teaching practitioners and leading professionals concerning the place of creativity in English, *Creativity in the English Curriculum* includes practical, research-informed ideas for effective creative practice for any English classroom. It is a must-read for teachers, educators, parents and guardians to prepare all learners for life in and beyond school.

Improving Foreign Language Teaching provides teachers and teacher trainers with a research-based structure for the effective teaching and assessment of

second languages. As well as outlining a model for teacher development, the book identifies and exemplifies eight key principles for effective language learning, which can be used to guide curriculum design and decisions about classroom pedagogy. *Improving Foreign Language Teaching* also presents practical activities, related materials, and guidance on how student progress can be monitored and recorded. Based on the research of the authors and other international experts, together with the work of a consortium established by the authors and teachers in a range of secondary schools, the book focusses on the development of language skills and communicative competence. It also proposes an assessment system which better reflects how learners progress in

language learning than current models. Taking as its starting point the challenge of a curriculum in flux and complex pedagogical approaches, this book offers clear research-informed guidance for effective planning, teaching and learning. It will be essential reading for all those concerned with the improvement of language learning and teaching in the secondary classroom. *One White Dolphin* Cambridge Scholars Publishing
Museums of Language and the Display of Intangible Cultural Heritage presents essays by practitioners based in language museums around the world. Describing their history, mission, and modes of display, contributors demonstrate the important role intangible heritage can and should play

in the museum. Arguing that languages are among our most precious forms of cultural heritage, the book also demonstrates that they are at risk of neglect, and of endangerment from globalisation and linguistic imperialism. Including case studies from across Europe, North America, Africa, and Asia, this book documents the vital work being done by museums to help preserve languages and make them objects of broad public interest. Divided into three sections, contributions to the book focus on one of three types of museums: museums of individual languages, museums of language groups – both geographic and structural – and museums of writing. The volume presents practical information alongside theoretical discussions and state-of-the-

art commentaries concerning the representation of languages and their cultural nature. *Museums of Language and the Display of Intangible Cultural Heritage* is the first volume to address the subject of language museums and, as such, should be of interest to academics, researchers, and postgraduate students in the fields of museum and cultural heritage studies, applied linguistics, anthropology, tourism, and public education. *Citizenship and Democracy in Further and Adult Education* Simon and Schuster The Routledge Handbook of English Language Studies provides a comprehensive overview of English Language Studies. The book takes a three-pronged approach to examine what constitutes the phenomenon of the

English language; why and in what contexts it is an important subject to study; and what the chief methodologies are that are used to study it. In 30 chapters written by leading scholars from around the world, this Handbook covers and critically examines: English Language Studies as a discipline that is changing and evolving in response to local and global pressures; definitions of English, including world Englishes, contact Englishes, and historical and colonial perspectives; the relevance of English in areas such as teaching, politics and the media; analysis of English situated in wider linguistics contexts, including psycholinguistics, sociolinguistics and linguistic ethnography. The Routledge Handbook of English Language Studies is essential

reading for researchers and students working in fields related to the teaching and study of the English language in any context.

Teaching English as an Additional Language in Secondary Schools

Cambridge University Press

This book invites readers to engage with the rich and complex debates of contemporary English education, outlining new possibilities to revive the teaching of English. Bringing together diverse voices and insights from educators in English across the primary, secondary, further and higher education phases, the book offers reflections and critical engagement with the lived experiences of English teachers and pupils in contemporary educational spaces. Each chapter includes example

vignettes from classrooms which tell something of the story of English teaching today. The book considers how politics and policy have worked to close the opportunities of the English classroom for self-expression and critical engagement with the world – a murder. The authors then offer an exploration of the opportunities for a re-imagining of English – the murmurs of teachers and pupils that resist such closures. The chapters explore new thinking, new practices and new possibilities for English classrooms as inclusive, emancipatory, critical and creative spaces. Offering a thoughtful and hopeful dialogue from practising English teacher-researchers, the book will be essential reading for researchers and students of English language and

literature education, as well as trainee teachers of English.

Ever since the Industrial Revolution energy has been a key driver of world politics. From the oil crises of the 1970s to today's rapid expansion of renewable energy sources, every shift in global energy patterns has important repercussions for international relations. In this new book, Thijs Van de Graaf and Benjamin Sovacool uncover the intricate ways in which our energy systems have shaped global outcomes in four key areas of world politics: security, the economy, the environment and global justice. Moving beyond the narrow geopolitical focus that has dominated

much of the discussion on global energy politics, they also deftly trace the connections between energy, environmental politics, and community activism. The authors argue that we are on the cusp of a global energy shift that promises to be no less transformative for the pursuit of wealth and power in world politics than the historical shifts from wood to coal and from coal to oil. This ongoing energy transformation will not only upend the global balance of power; it could also fundamentally transfer political authority away from the nation state, empowering citizens, regions and local communities. Global Energy Politics will be an essential resource for students of the social sciences grappling with the major energy issues of our times.

This book addresses the questions why citizenship education is an important subject for students in further and adult education and why we need democratic colleges to support the study of citizenship education. It investigates the historical roots of further and adult

education and identifies how the adoption of citizenship education in the post-compulsory sector can enrich vocational studies in further education and programmes in adult education. It is argued that democratic colleges are vital to ensure that citizenship education informs the decision-making process throughout educational institutions (and as a means of establishing fair and equal representation for important stakeholders). The author has worked in both sectors for over a decade, and uses this experience to offer a blend of educational practice and philosophical investigation. The result is a work that appeals to both teachers in further and adult education as well as academics and students interested in philosophy of education.

As teachers grapple with the challenge of a new, bigger and more challenging school curriculum, at every key stage and phase, success can feel beyond our reach. But what if there were 50,000 small solutions to help us bridge that gap? In *Closing the Vocabulary Gap*, the author explores the increased demands of an academic curriculum and how closing the vocabulary gap between our 'word poor' and 'word rich' students could prove the vital difference between school failure and success. This must-read book presents the case for teacher-led efforts to develop students' vocabulary and provides practical solutions for teachers across the curriculum, incorporating easy-to-use

tools, resources and classroom activities.
