The 1930s policy of appeasement is still fiercely debated more than 70 years after the signing of the 1938 Munich Agreement. Less examined is the role of public opinion on the formation of British and French policy in the period between Munich and World War II. *Public Opinion and the End of Appeasement in Britain and France* is essential reading for scholars of the origins of World War II.

Cultural and intellectual dynamism often stand in close relationship to the expression of viewpoints and positions that are in tension or even conflict with one another. This phenomenon has a particular relevance for Early Modern Europe, which was heavily marked by polemical discourse. The dimensions and manifestations of this *Streitkultur* are being explored by an International Network funded by the Leverhulme Trust (United Kingdom). The present volume contains the proceedings of the Network's first colloquium, which focused on the forms of Renaissance conflict and rivalries, from the perspectives of history, language and literature.

Understanding policy analysis in France requires first a thorough exploration of the distinction usually made in French academic and practitioner debates between policy studies and policy

analysis--essentially the difference between studies of policy and studies designed for the use of policy. This book begins there, then delves into questions of how and by whom knowledge of policies is produced within and outside the French state, showing that while the tension between the two types of study is real, the continued exchange of ideas between them has led to an enrichment of both spheres. The book thus lays the foundation for a more systematic understanding of policy analysis in France.
