This presentation skills book will enable you not only prepare mentally for your public speaking but also to understand the psychology and neuroscience of your audience, so that you can present in a way that appeals to the nature of the human brain. The same presentation or class can get you a standing ovation or a cold unsympathetic audience depending on the way it's delivered and the context in which it's delivered, so you have to pay attention to the basic psychological factors. Even if you gave exactly the same presentation to the same group of people, in a different context they might interpret your words and body language differently, as they may approach it with a different mind-set, together with a different set of beliefs and expectations. When you approach a presentation, class or meeting in a professional setting, you need to decide exactly what you want from the exchange from the outset, and then, what context you are interacting in.
